Subject: Please post my Quail Brush (11-AFC-03) comments for public review
Date: Wednesday, November 14, 2012 10:58:08 AM

Please post my email in CEC Docket 11-AFC-03, the Quail Brush Power Generation Siting Case, for public viewing.

I oppose the Quail Brush power plant for many reasons that include:

1. 100 foot high smoke stacks spewing more than 200 tons of toxins and pollutants yearly to nearby schools, parks, and residents.
2. Mission Trails Park visitors, Santee residents, and other nearby residents will suffer from noise pollution.
3. Mission Trails Park visitors, Santee residents, and others will suffer from visual blight.
4. A gas-fed plant being built in a highly fire prone area near schools, parks, and residents promotes potential disaster.
5. Historical 3 - 7% reduction in property values for nearby residents of power plants in an already depressed housing market.
6. The impact on the sensitive wildlife like the coastal California gnatcatcher (CAGN), Least Bell's Vireo and Quino Checkerspot.
7. The San Diego Planning Commission's recognition that this project is a bad idea and should not move forward.
8. The San Diego City Council's recognition and unanimous vote that this project is a bad idea and should not move forward.
9. It is in conflict with the East Elliot Land Use Designation.
10. It is in conflict with the Mission Trails Design District Ordinance.
11. We should be pursuing truly renewable energy

resources and technologies such as solar, wind, and grid power storage.

The proposed location and power generation technology is an extremely poor choice for San Diego, and only serves the greed of corporations while threatening the health and welfare of San Diego County citizens.

Respectfully,
Bob Roberts
Santee, California
