David,

If the effective date is October 1, the first annual report would be due by October 31.

Ok- thank you for that clarification!!
So in the worst case "the latter" refers to a deadline of Oct 30th if the effective date is Oct 1st?

David,

The first annual report, which will have information for both the 2011 and 2012 calendar years, is due by September 1, 2013, or 30 days after the effective date of the regulations, whichever is later (probably the latter). Any RECs that you wish to retire toward 2011 or 2012 should be retired before the reporting deadline to include them in your annual report.

The historic carryover report is due within 90 days of the effective date of the regulations, so all historic carryover RECs must be retired before that point to include them in the report and claim them toward your RPS.

Let me know if you have any further questions!

Subject: Retirement of RECs

Angela-

Hi Angela- hope you are doing fantastic. A quick question…

I just wanted to double check because there seems to be some confusion amongst folks as to when the POUs are to start retiring RECs for compliance. My understanding is that the first time we are to retire RECs for the first compliance period is within 90 days of the effective date of the Regs. Is this correct? So we don't have to have any RECs retired for compliance by July 1st of this year, correct?
