Stop the planning for battery storage in SJC!

As a long time Equestrian and Horse owner for more than 35 years in the city of San Juan Capistrano I am against building any kind of lithium battery storage facility as it will strongly impact the environment and create a serious hazard for fire in the area. There is no way hunters of horses could be evacuated in such a situation. It's an irresponsible unthinkable suggestion and plans need to stop from going head any further! The state the county and the city has a responsibility to protect the people and the animals as well as the wild environment in the area.
