Why San Juan Capistrano

I have learned about the battery storage project proposed for our community of San Juan Capistrano - home to families, schools, a thriving equestrian community and incredible nature such as the precious hills and creeks that currently flourish. Why here? I have flown over this State many times and see VAST areas of undeveloped land far from any communities. The potential risks it poses to such a populated area are too high with too much at stake. Cancel this plan and relocate it elsewhere, far away from people and our fragile ecosystem.
