Donna Tracy asked me to forward her comments for docketing with the CEC and for comments to the Air District. For some reason they were returned to her.
Please Docket

Chris,
Here is my letter. I'm not the greatest at expressing myself, but at least it's another no that's being voiced. I rechecked the adresses you sent me.

I am opposed to this project. As a Buttonwillow resident I believe it would only add to the pollution in our valley. I find it hard to understand in an area that has some of the worst air in the

nation you would want to add to it. The other concern is this area has some of the most productive ag land in the nation and the proponents have not been able to show it would not be harmful. Whatever happened to the idea of placing these types of projects in a low populated, low producing part of our country?

Thank you for your time,

Donna Tracy
