## **Stop the Compass Energy Storage Facility**

Please do not approve the Compass Energy Storage Project as it presents a significant danger to the surrounding residential community. The facility would be located at the base of a hill that is filled with dry brush. In light of the number of fires at similar facilities, how difficult they are to put out and being adjacent to very combustible dry brush that abuts many residential homes, this facility presents a substantial danger to nearby residents.

A facility such as this should be located outside of a very densely populated area that is a known fire hazard. The recent fire in Pacific Palisades is a very good example of how a fire in a densely populated area got out of control and caused loss of life and hundreds of millions dollars worth of property damage.
