Battery Storage Proposal

CA Energy Commission:

I am writing to express my deep concerns about allowing the Compass Battery Storage project to go through. This is an unacceptable risk and as long time citizens of this great city, I urge you to relocate this project. We already live in a high fire area and are densely populated. This is not in the best interests of our city or neighboring communities either. If this project goes forward, our local officials need to have oversight of this project to protect our rights as homeowners. Please relocate this and terminate this agreement immediately.
