Stop Battery Energy Storage Systems

I am writing to express my strong opposition to the proposed battery storage facility in San Juan Capistrano. I purchased my home in Laguna Niguel last year, and had I been aware of this project's proximity, I would have reconsidered my decision to buy in this area.

The construction of a battery storage facility so close to a residential community raises serious concerns about fire hazards, environmental impact, and air quality. These risks not only threaten the well-being of nearby residents but also have the potential to significantly reduce property values.

The community has made it clear that this project is not welcome. I urge you to listen to the voices of the residents and halt the construction of this facility.

Sincerely,
Shadi Afkhamirad DMD, BS, BA
