Listen to the residents and stop this project now!

This project and all that it entails is a threat to the rural land of northern San Juan Capistrano. It is a fire danger to all of us who live in or near this area. I am appalled that the California Energy Commission is considering casting aside the voice of the citizens of San Juan Capistrano in favor of this highly invasive project. Please do the right thing and prevent the Compass Energy Storage Project.

Thank you very much,
Marilyn Peo
