Against BESS in San Juan

Please stop the creation of a lithium battery plant in our densely populated town. There are schools, homes, and precious ecosystems right next to the site proposed for this project. It is an outrage to try to build such a plant in a residential area given the risk of a fire at the plant. Such a fire would release toxic heavy metals into our air, soil and the adjacent creek leading to Doheny Beach. The economic impact on this community, which depends on tourism, would be disastrous in the event of such a fire.
