In opposition to the Compass Energy Storage Project

I am writing to oppose the proposed Lithium Battery Storage Facility (Compass Energy Storage project) that is currently being planned in the San Juan Capistrano area, This facility would be located approximately 4,000 feet from my childrens' school (Capistrano Valley High School.) The risk of toxic exposure to staff and students is of grave concern. Additionally, this project is in a very high risk fire area and greatly increases the risk of catastrophic fire damage to the many homes surrounding the proposed location site. I urge you to deny the application for development.
