## **Reject the Compass Project**

My wife and I have lived in Laguna Niguel for over 30 yrs. We are less than two miles from the proposed Compass project battery storage site. The risks are far too high. We were at the meeting with the CEC yesterday at the SJC School District and heard dozens and dozens of other concerned residents that expressed the same sentiment. We are not against Green Energy, but the SJC location is a terrible location. There must be other options that offer the same access to transmission lines and needed logistics. Locations that do not pose dangerous and deadly risks to thousands and thousands of residents and hundreds of businesses. There are many schools and a hospital and senior living complexes as well that would be negatively effected by the Compass project. It will bring down our property values and make getting home owners insurance even more difficult and expensive to obtain.

Please reject the Compass project at the SJC location and find a safer and more remote location for it.

Thank you very much.
