Strongly oppose project

Democracy should mean local residents have a say in the safety of the community. A corporation should not be allowed to go against elected city council members who have already rejected this project. This project endangers the lives of 2k CVHS and 400 Compass Church School students including my son who will be directly affected by the chemicals and pollution produced by this industrial facility. Faulty batteries will leak chemicals and will be aerosolized and blown to the nearby students to breathe in. Residential areas should be limited to schools, churches, and parks, not industrial energy facilities. Please vote no on this matter and keep the residents of Laguna Niguel safe.
