Against the battery farm in SJC

I attended the public hearing yesterday and felt it was very clear that the risks of having lithium batteries in the proposed location far outweighs the benefits. I hope the commission heard that many people are not against the idea of having lithium battery farms and renewable energy, just not at this location, The many dangers expanded upon clearly outlined the dangers of unstable ground, one way in and out location, too close to schools, businesses, and communities. It was interesting to hear the city had suggested alternate locations and were turned down. Also enlightening to hear previous business owners history with the location and problems with developing due to risks. As a local citizen, I beg you to deny the proposed location for the battery farm for my health and financial implications to me and my family and community. Respectfully, Peggy Werner
