Resident Opposition

I am writing to strongly oppose this project at the currently proposed location. As a former resident of Laguna Niguel and current resident of San Juan Capistrano who has hiked along the ridge above the proposed project site, it is shocking that this location has been selected based on the geological hazards and proximity to homes, multiple schools, and elderly care centers in a high fire risk area. However, if this project does proceed at this location, please consider additional fire protection measures to protect the community.
