I Am Opposed to the Battery Energy Storage System Project

I have been a resident of Laguna Niguel over 40 years. I have seen a lot of changes, but I do not want to see the Battery Energy Storage System Project approved at San Juan Capistrano. These sites utilize lithium iron batteries, which can pose a severe fire threat. According to the Orange County Fire Authority (OCFA), lithium-iron batteries can cause explosions and emit toxic gases within seconds if overheated. This proposed site is approximately 1,500 foot distance from homes in our city. Please do not approve this project.
