### **lithium battery facility!!!!**

I am horrified that this site would even be considered! It is close to the freeway that is the only way north and south in OC. It is close to all ages of childrens schools from grade school to junior college. I hike weekly on the trails that are on the perimeter of Saddleback Church property, right now the hills are beautiful with native plants and flowers, the area is maintained and beautiful, a true delight in this heavily populated area. We do not need any more big polluters- we have San onofree just down the freeway,. We don't need any possibility of air pollution from any long term fires as we've seen these batteries can create. We need storage facilities but... not close to watershed, freeway, schools, housing developments and densely populated areas. This is not a good site- from all aspects!
