OPPOSITION TO LITHIUM BATTERY STORAGE FACILITY

I live just above the proposed site for the battery storage facility and am vehemently opposed to a facility of this nature in this location. First of all, it is a fact that my home and all my neighbors are sliding down the hill due to the instability of the land. Secondly, we have had numerous fires in the hillside adjacent to me and live in an area with overgrown and unmaintained brush year after year. Our fire risk has been elevated this year by the state! Thirdly, we are in a highly populated area with numerous homes, wildlife, horses, trees, train tracks and freeway surrounding me, making the risk to lives even greater. ENGIE mentioned that employees will be remote due to risk of their employees....then why is it okay for it to be near us??? Other concerns....There is no escape route in case of an emergency, the opportunity of a terrorist attack is not far-fetched and the risk of EMF associated with increased power lines has also not been debunked as a health concern (i.e. cancer).

There are more appropriate sites for this facility. Since the state is pushing this agenda and has taken control away from the local cities, perhaps it could use state land such as San Onofre, which is already plumbed for this type of facility.

On a side note, I am horrified that companies/organizations have been bribed to support this project in this location. Saddleback College took the bribe and The Ecology Center did not!. How many others have been offered money to support this???? Plus, approximately 390 out of the 400 individuals that signed in support of this project did not live anywhere close to this facility. These things should be investigated before this application goes any further as the "support" is not legitimate! It opens the door for lawsuits....

PLEASE PROTECT US AND OUR HOME AND DO NOT SUPPORT THIS COMPASS PROJECT!!! THANK YOU!!!
