Strong Opposition to Compass Energy Storage in Laguna Niguel, CA

I strongly oppose the proposed compass energy storage project in our community of Laguna Niguel. Laguna Niguel is located in an extremely high fire zone. In recent years we've experienced two serious fires very near our home, making safety and fire prevention a top concern.. The proposed site is surrounded by thousands of homes and lies adjacent to critical infrastructure, including the 5 freeway railroad tracks and three major schools. I fully support California's goals for renewable energy and understand the need to improve energy storage. I urge you to consider an alternative location for this project one that does not put such a densely populated high risk area and potential danger. We can, and must find solutions that prioritize, both sustainability and consideration.
