What would you do in our place

Please consider honestly what YOU would do if forced to live next a potentially dangerous facility with your family by the state - planned by a corporation that has no interest in people's safety and only wants to make a profit. The facility plans to be plopped right into the middle of a busy city consisting of families, retirement homes, hospitals and small businesses. You might as well build it in the middle of Sacramento. Please consider people not corporate profits. Thank you...Fred Tarnay
