Opposing Lithium Battery Storage project in San Juan Capistrano California

I am opposed to the Lithium Battery Storage Project in San Juan Capistrano. The proposed project is located in an area that is located on land near brush-covered hillsides, train tracks, the I-5, schools etc. A fire, would shut down the I-5 Highway because of its close proximity, which is a main artery for south Orange County residents. A fire would be catastrophic in this area and would create a state of emergency. Closing the I-5 highway would prevent access for San Juan Capistrano and San Clemente residents to get to hospitals, pick up children from school, and commute to work etc. It would shut down trains (Metro Link, Amtrak and freight trains) and could potentially cause millions of dollars in damage to the infrastructure and property. I am urging you to not move forward with this location for the proposed lithium battery storage project in San Juan Capistrano.

Thank you,

Nicole Clerkin
