Compass Enenergy Storage LLC proposal to construct battery storage facility in the City of San Juan Capistrano

As president of CCRPA I am writing to voice our opposition to the proposed battery storage project. In addition to the potential impacts to the community, the project has the potential to impact Juaneno/Acjachemen religious ceremonies at the Putuidem Cultural Park that is located less than a mile north of the sacred area. In addition, the cultural resources study seems inadequate and there is the potential for impacts to buried cultural sites. I also could not find information that culturally related Native American tribes were consulted.

Sincerely,
Patricia Martz, Ph.D. President
