Deny Compass lithium battery facility

I am strongly opposed to the Compass energy lithium-ion battery storage facility in San Juan Capistrano which is located 1,500 feet below the heavily populated ridge line area of Laguna Niguel. This issue needs to be addressed with common sense. These facilities have a potential for fire & this is a severe fire zone with thousands of homes, senior care facility, senior apts., a total of 6 schools, railroad tracks; water creek, as well as areas of land that have been eroding for decades! A potential fire threat endangers both communities due to the dry brush vegetation where fires have occurred in past years. This is not the right location for a BESS facility. Firefighters have prevented fires from reaching the top of the hillside throughout the years but fighting a regular brush fire and a lithium battery fire at the same time would certainly lead to catastrophic devastation & loss of lives, homes & infrastructure.. Most of the hillside homes are on cul-de-sacs in Laguna Niguel with only one main exit street. (Golden Lantern). People would be trapped while trying to evacuate and the 405 freeway may be closed in both directions, Unfortunately, there have been several lithium battery fires-Escondido, Valley Center, East Otay Mesa, Moss Landing & many others globally. Common sense, Location & safety should be the first priority without an experiment. I urge you to deny the Compass project at this facility. Other safe locations were offered by the mayor of San Juan Capistrano to Compass Energy. No need to destroy this community. Please listen to the people.
