Compass Energy Storage Project

TO CEC: I as a resident of this area over 45 years wish to state my opposition to this project. This project is a danger to our communities and opens us to Fire Risks which are high to occur as in other storage areas with Lithium batteries. Our area is a high fire area already established and will deplete Fire & Medical response to our communities as fire fighters are sent to this location and our Hazmat Team is located many miles away in Santa Ana. The fire would shower the area with toxic material into the air and soil while it cannot be put out with water while watching it burn per protocol!!! Environmental impact as the toxins flow in the smoke to homes and schools in the area and flows into the creeks heading to the pacific ocean!!! Please deny this high risk project!!!
