Oppose Compass Project

Our home is less than 1500 feet from the proposed Compass Energy project, on the ridge above the site. We are in complete opposition to having this project built on the acres currently owned by Saddleback Church.

It is noted that the facility would interconnect to an existing SDG&E transmission line located 500 feet from the project site and approximately 90 feet from the project property. That is a convenience for this developer. Convenience for the developer should be incidental. How the project would affect the surrounding population should be the number one consideration. The affected area is greatly populated with homes, businesses, schools, hospitals, animal facilities, wildlife, sacred native American sites, and major transportation corridors. Safety should always be First!

A recent fire at a Moss Landing lithium battery storage facility resulting in evacuations for residents and animals, poor air quality, and days long closure of a major the transportation corridor, show us these facilities cannot be reliably safe from spontaneous fire and toxic fumes.

City officials of San Juan Capistrano and Laguna Niguel vehemently oppose the Compass project because the risks are too great. Please join them and DENY the Compass Energy Storage Facility in San Juan Capistrano.

Sincerely yours,

Kelly Bridge
