I OPPOSE COMPASS lithium battery energy storage facility

Too many dangers imposed by COMPASS lithium battery energy storage systems, The risks and impacts cannot be ignored, especially in densely populated areas like ours in San Juan Capistrano and surrounding areas. The proximity to schools, neighborhoods, and wildlife habitats potentially endangering families and ecosystems. I have heard fire officials talk about the Fire Hazards. It's not a matter of IF, but WHEN fires will happen and these lithium battery systems have a history of high-temperature fires that can spread rapidly and are difficult to extinguish. Battery fires release harmful chemicals, potentially jeopardizing air quality and public health. Then there is also the groundwater contamination from battery waste. I OPPOSE Compass Lithium Battery Storage in a highly dense populated area!!!!
