## **Deny the Compass Energy Storage Project**

Please consider the consequences of this proposed project. This project should not be considered in the proposed area; this project should be denied. There are too many red flags being raised against this project. First, this area is not zoned as industrial. There are soil erosion and landslide issues with this area. Regulations can not keep up with these projects. When a fire occurs from this plant, there are major constraints on evacuation at this site; it lacks a second evacuation point. This site is extremely close to the high school and community housing and should be considered a hazard to public safety. My family and I oppose this project. The fact that this project has been offered alternative places to be built, and they turned it down, should tell you plenty.
