Deny EV storage in SJC

Dear California Energy Commission and To Whom It May Concern;

I am writing to you regarding the plans for storing EV batteries in San Juan Capistrano. I am deeply concerned for the safety of our community, I live one mile from the purposed site. We have lived in Laguna Niguel for thirty years, have worked hard to pay our home off and now retiring this year.

We never thought we would have to write a letter such as this. With a large trauma center, several schools, housing, trains transporting thousands from San Diego to Los Angeles and back, we strongly urge you to deny and oppose this site as an EV disposable farm. Fires have broken out on this hillside in the past, this will put us all in great danger, along with wild life.

We are praying that God will touch your hearts giving you the opportunity to do His will and protecting the people and the nature all around there. It would be heavy on your heart when something catastrophic occurs.

Please consider safety, health and well being.

I thank you for your time, patience and understanding. As I'm sure you all would feel the same way if this were in your own community.

Kindest Regards,

Marina Arnold
