## **40-100mph Santa Ana Winds NOT Including Gusts**

You have heard about the Santa Ana winds from many people now, including me. If I were at a meeting right now sitting in front of you with people from SJC, Laguna Beach, Laguna Niguel, Dana Point, San Clemente and all the way back to the extremely dry Saddleback Mountains and I asked "who has lost trees or been blocked in by branches from the Santa Ana Winds, everyone would raise their hands. Those winds constantly knock down trees, blow debris everywhere and that is something we have gotten used to. Fact: Santa Ana winds have recorded up to 100mph. This is without the gusts that take massive umbrellas, full trashcans and not branches but full adult trees down and block our streets. You have seen all the trees at Saddleback church SJC. You want to add more around your ugly dumpsite which is absolutely the stupidest idea I've ever heard. The trees alone will knock down the already unstable facility due to the landslides and there will be toxins and fires. To add the fire and wind, the spot you have chosen to "let a fire burn out" will kill people due to the 100mph. We will not have time to evacuate. A wind tunnel of those winds are going to ignite the entire valley where there are schools, sacred grounds, homes and it will go all the way down to Dana Point harbor where the ocean breeze pushes the winds back up in opposite directions. I live on the top of the ridge and it doesn't make sense why you need a dump site with an ocean view and a bunch of communities. There is no common sense here. NONE. Please use your brains and not your pocket books that we don't need. The land is sacred. How dare you falsely give \$750,000 or try and have been denied. If you build this, you will have so many lawsuits because you have been warned and you are liars. Bad intentions while being deaf, blind and dumb doesn't get you far in life. The Death toll will be on you. Shame on you.
