Strongly Opposed - please represent the wishes of the people not companies

Representative of the people, I implore you to reject the location of this project. I live directly across the freeway, and my friends live directly behind the proposed location. None of us are against sustainable energy, but to approve a project in a densely populated area is reckless and endangering many lives. Every other entity is against the location of this project. These battery storage facilities are known to be dangerous and burn for days and release caustic airborne hazards. No amount of them explaining how theoretically the fires are contained will ever suffice. Our homes, lives, and health are at stake here. Please effectively represent the people which you serve to direct this company to install a facility in an area that doesn't impact and endanger so many families, school, businesses, and communities.
