24-opt-02 and Compass Energy Storage Project NOP comments

I am writing to you regarding the lithium battery storage area being considered for San Juan. Lithium batteries are a known fire hazard and putting them in the middle of a field that is full of dry brush and wildlife is reckless.

My husband was an American airlines captain of a 777 for 40 plus years . He flew between Shanghai and Los Angeles and would refuse lithium battery cargo after seeing the fires they caused while being loaded onto the plane. Luckily the fires occurred on the tarmac and not 100s of miles over the ocean.

I care about our community and surrounding areas. We have experienced many fires here in Southern California during the Santa Ana winds. We don't need to introduce a known hazard.
