Compass Energy Storage Project

I have lived in the beautiful city of Laguna Niguel since 1987 as an adorable 4 year old. Once married and with a family of my own I chose to continue to live here. As a resident for 37 years, a payroll tax payer since 1998 and homeowner since 2023 I feel my voice deserves to be heard. I am appalled that my suburban area's wellness and livelihood is being threatened by the lithium-ion battery facility. I am adamantly opposed to this facilities development. There are real dangers of fire, human error, potential terrorism, environmental toxicity and so much more. I am aware of the country's need for renewable energy BUT I know there has to be better areas that are not surrounded by native american land, a convent, multiple schools and thousands of hardworking residents of all income classifications. I believe we deserve the right to say "NO" to the battery storage facility.
