24-OPT-02 and Compass Energy Storage Project NOP Comments

Honorable Commission Members,

I am very much opposed to the creation of a Battery Energy Storage System in San Juan Capistrano.

It is a very, very bad idea. Actually, it's a disastrous idea.

Such a Battery Storage System possesses many risks. The most likely is the potential for such batteries to catch on fire and continue to burn for days before finally burning out while emitting toxic chemicals into the air.

I ask that the California Energy Commission do the right thing and reject the project application. Public safety and quality of life are at stake for the residents of San Juan Capistrano and Laguna Niguel.

Sincerely,

Caroline Sullivan
Laguna Niguel
