## **Inappropriate use of land**

I am vehemently OPPOSED to the Compass Energy Storage Project planned for San Juan Capistrano for a multitude of reasons. Too many to list but here are some. I feel it is not an appropriate location for a facility of that sort. The facility would pose hazards to all residents, businesses, train traffic, freeway traffic, emergency responders, hospitals, and the environment for many miles in all directions when (not if) there is an emergency. The proposed location has VERY limited access at the best of times and the access/egress would only get worse during an emergency. The risk of fire to the neighboring communities is enormous and could wipe out thousands of homes in hours as seen in Pacific Palisades. The threat to the local flora and fauna and the ocean is also of great concern. The list of hazards and concerns this facility poses if built in the proposed location just goes on and on. It is not an appropriate use of this land! I don't believe the developer has the best interests of OUR community in mind. I believe the all mighty dollar is the only concern on their minds. They have already displayed some shady business practices through inappropriate influence of a local institution in order to get their application submitted and trying to have meetings scheduled in Los Angeles and then Santa Ana instead of close the the proposed project site. DON'T ALLOW THIS PROJECT TO GO FORWARD!
