Battery storage facility in San Juan Capistrano

This is regarding the proposed Battery Energy Storage Facility off of I-5, between San Juan Capistrano and Laguna Niguel.

This site is very close to hundreds of homes and absolutely not safe for the community. You need to look at other options that do not negatively impact the local community.

Ask yourself.. would you live in a home and raise your family in one of the adjacent houses? Of course not. Nobody would. Don't put it there.

Jill Donaldson
Laguna Niguel
