OPPOSED

I have been a Laguna Niguel homeowner for nearly 40 years, and the reason we chose this area of southern California was for the amount of open space and natural beauty and the sense of community.

The possibility of a lithium battery storage facility being built in the proposed location in SJC is unbelievable. The impact to the safety of human life, the homes, businesses, schools, hospitals and emergency responders, greatly outweighs any possible benefits of this storage facility. Not to mention the impact to the wildlife, beaches and ecosystems in the event of any explosions or fires.

PLEASE DO NOT LET THIS PROJECT PROCEED IN THE PROPOSED LOCATION!
