Erin Beyer Comment on 24-OPT-02 and Compass Energy Storage Project NOP Comments

Dear commission members,

I was unable to attend the two most recent meetings but wanted to register my STRONG OPPOSITION to this absolutely disastrous proposed project.

Pretty much everything is wrong with this application. But most notably the location.

When, not if, but when this facility catches on fire it will damage nearby homes, open space filled with wildlife habitat, shut down major transportation corridors (the I5, 73, and railway). Not to mention pollute our community with all the toxic chemicals that will not be in our air and water which drains to the ocean.

There are no positives to this project. Not one redeeming quality. Iâ€™m not sure where the best location would be but I do know that this is the worst location possible.

Please, please protect south Orange County residents, property, wildlife, open space, water, our ocean, and air quality.

Please JUST SAY NO!

Erin
