Kristi Kim comment - 24-OPT-2 Compass Energy Storage Project NOP

To whom it may concern,

The battery energy storage facility is very scary and terrible idea for the proposed location in San Juan Capistrano. The area is already susceptible to wildfires. A battery facility should not be put in a wildfire prone area nor should it be so close to people's homes, 3 schools (one of which my daughter goes to) and the ocean. Please consider changing the location for this plant so there would be far less devastation and destruction should it catch fire as so many battery plants have recently.

Sincerely,

Kristi Kim
Laguna Niguel, CA
