I adamantly oppose the project as it is FAR from an intelligent or safe location. Extremely disappointed to hear Saddleback College accepted a payout for their support of this project, any payment should nullify their classification as "Public Support". Also beyond disappointed in Saddleback Church's allowance of this proposed site. The administration should be investigated for how they use the land that was donated to them. Should they have taken a vote from their congregation that pays their salaries with their tithing. I guarantee they would not have supported putting themselves or their neighbors in danger.
