Lithium battery storage in Laguna Niguel

We strongly oppose this facility in our neighborhood as it is unsafe and dangerous to the community. Our homeowner insurance premium went up from \$4,700 in 2024 to \$6,200 this year. With this dangerous facility in our neighborhood, our premium will sure to increase further or we may not get any policy at all! As one of our neighbor said at the meeting yesterday, if the facility is approved by CEC, we will have no choice but to take legal action in court.

Please make a right choice and deny this application.
