No Battery Storage! Toxic and Dangerous

Our family is against this battery storage for many reasons and here are a few:

1. A major freeway in CA would be blocked with every fire-Major hazard.
2. Toxic fumes with each fire being so close to so many homes and schools. There are at least 4 MAJOR schools within the immediate area surrounding the proposed area. Not to mention the amount of homes, neighborhoods, wildlife, trails, etc. that would be in jeopardy.
3. The proposed area is already a Fire hazard area.
