Adamantly Oppose Compass Energy Project

I am a resident of Laguna Niguel and adamantly oppose the Compass Energy Project for many reasons but particularly because of safety issues. This facility is dangerous and located close to homes. It is a fire hazard and could risk not just homes and businesses but lives. There is very limited ability for firefighters to access the site if there were a fire and a fire could quickly spread up the hill, which is full of vegetation and reach homes. This kind battery storage facility has caught fire and exploded. Many people could die if this were to happen.

Most in our city and adjacent cities oppose this project for good reason. As a tax payer and voter I expect better from our state government and state agencies. Do not approve this facility in this location.
