## **Support Comment - Compass Energy Storage Project**

Dear Commissioners,

I am a resident of Dana Point. I support the Compass Energy Storage Project which is proposed to be built In San Juan Capistrano for the following reasons:

• It is the right thing to do to protect our environment by increasing the grid's capacity to continue delivering renewable energy when their sources are periodically not producing.

• This project supports a resilient energy future for our community and California in the face of climate change.

• Battery Energy Storage Systems have and will continue to rapidly improve in safety and reliability, and our community expects that the CEC will vigorously and diligently hold utility operators to the highest operational safety standards.

• Supporting this type of clean energy infrastructure is part of our shared responsibility to all residents of our state. Every community in California should contribute to grid resilience and expansion of renewable energy delivery by supporting projects like this one.

Thank you for the opportunity to voice my support for this project.

Sincerely,

Sam Kopp
