## **Close to Wild Fire Zoning**

The Battery Storage Project is too close to dense residential housing. We are asked to build more home to house more people, it is not to potentially poison the air, like what happened in the Palisades fire after a wild fire the air quality was filled with carcinogens. This project needs to be away from where people live and work. Lawsuits will happen as it will seep into our water supply, air and soil. This needs to be more strategically done, underground in the desert where there is no farming, no water, no people or animals.
