Docket Number 24-OPT-02 - Compass Energy Storage Project STRONGLY OPPOSE

Docket Number 24-OPT-02 and the Compass Energy Storage Project proposed in San Juan Capistrano is a very poor choice of location. While I support sustainable energy production and storage, being a homeowner that has had solar panels on our home in San Juan Capistrano for 15 years and drives an EV, I strongly oppose locating the BESS in this location. This location poses an extreme hazard to the surrounding communities, schools, retirement communities and native cultures, rail-line, and Interstate 5 due to the risk of fire, hazardous chemical discharge and the amount of water needed for putting out a fire and/or cooling the heated batteries. Please locate a future BESS in a less risky area.

Thank you,
Debra Kettler, San Juan Capistrano
