Opposition to the Compass Energy Storage Project in San Juan Capistrano

I am in favor of battery storage to combat the needs of renewable energy BUT I strongly OPPOSED this location (San Juan Capistrano). It is too close to residence. These battery storage facilities have shown fire incidents in Northern California (Monterey) and San Diego and it has been very difficult to extinguish. The location for this proposed battery storage is in a high fire risk location and we don't need to increase risks of fire. Thank you for your understanding.
