Battery storage site

I am totally opposed to using the site here in San Juan Capistrano next to the five freeway. As has been stated so many times by so many people. It is a horrible site too close to and main thoroughfare the five freeway too close to schools elementary all the way up to college too close to residence on both sides of the freeway and commercial, which is in San Juan and also off of Avery. There's much open space in the desert area. I know we need to have storage facilities, but not in a densely populated so close to Watershed as well as to the ocean runoff as well as to this main artery of the five freeway and putting pollution in the ground and in the air with a populated widely diverse population is definitely not in anybody's best interest. Please look for an alternative site. Please leave this site in its natural state and with the small buildings that are there that are not creating excess pollution, environmental issues or traffic. This is in an atrocity. Excess pollution, environmental issues and traffic. This is in a atrocity. The opposition is voicing their concerns and please take note, and stop this idea!
