## **Battery Energy Storage systems Project - San Juan Capistrano, CA**

I am completely opposed to this project. I have been a resident of Laguna Niguel, which is adjacent to San Juan Capistrano for the better part of 25 years. I have served in our community as a volunteer president of the Dana Hills high school SOSCA arts Foundation and I live walking distance to the project site. San Juan Capistrano's city council has already denied the request for this project and the proposing company has gone above the City's head to the state for approval. There is already so much distrust of our government and it's interest in serving and protecting our citizens and communities and approval of this project will incite the existing distrust. Please deny this project for this location. It is far too close to schools, homes and communities. We have so much open land in our country. Why on earth would a project that presents the sort of danger to our communities comparable or worse to the Moss Landing area recent fire igniting from the battery storage facility there? It would nearly be an admission of having no concern for the safety of our citizens. You cannot allow this to happen. I beg you to vote no to this location. Please find some open space in Arizona, New Mexico or anywhere else that doesn't present risk to our established safe communities. California has already been on fire. Do not propagate these risks. Please.
