Absolutely oppose this so close to residential, freeway and creek

I absolutely oppose this project aimed at San Juan Capistrano and neighboring Mission Viejo, Dana Point, Laguna Niguel and others. There are so many factors that are being presented as considered and deemed safe, but there is no way that the potential and likely damage that overheated lithium batteries can cause belongs anywhere near Orange County, or our South Orange County coastline.

It is truly unbelievable that this project would go forward with approval from your agency, fire authorities, and others at certainly know the risks involved. It is not a matter of when, but why here?
