No Corby BESS on BYRNES RD

Hello,

My family and I strongly appose to the installation of the battery energy storage system proposed to be built right next to our property in Solano County. We ask for the safety of our family and the community that you do everything in your power to help stop this project. It is not safe for families and communities to live close to these unreliable systems. Toxic fumes will endanger our air and ground water when they do catch on fire, and they will eventually catch on fire. There is no way to put them out. Even Corby has told us that the fire department just has to watch them burn until all the fuel in the battery is burnt up. This is not safe for our air, soil or ground water.

Sincerely,
Brian Keating
